

# How Effective is TheGridGuard?

## The Grid is 100% effective!

With hundreds of Systems installed across the US, Mexico and Canada, we quickly learned that going “toe to toe” against Mother Nature can take some doing. She is a formidable opponent!

We are helping Clients deter rodents & other critters of every breed, variety with unique environmentally driven behaviors. The System will certainly deter:

Rats, Mice, Chipmunks, Rabbits, Raccoons, Scorpions, Spiders etc. etc. – Even Bears!!!

The basic principle of how the Grid works is that we create a picture frame around your assets with Tiles that are one square foot. The Tiles can be configured to any length and width that suits your needs. A bespoke electric fence energizer is used to deliver a (Client Selected Kv) electric pulse to the Grid. Safe, Humane & Effective!

That said, we’ve learned that “Tree Rats” behave differently than “Pack Rats” and both of them behave differently than “Roof Rats”. Same goes for all different breeds of Mice!

## How many Tiles will I need to deter my specific breed of critter?

That’s a Really good question..... In our experience:

- 85% of the time, 1 row of Tiles around your vehicle does the trick! See Pic.
- 10% of our Clients require a double row of Tiles around their vehicle.
  - Generally needed when your particular breed of critter has learned to jump before encountering TheGrid. See Pic.
- 5% of our Clients require a double row of Tiles with tire pads.
  - That’s some really feisty breed of Critter you have there!!
  - We only have one Client (to date) needing this configuration. See Pic.

## How much does all this cost?

We understand how frustrating and costly your whole encounter with rodents has been or can be! We also understand that the Grid is not an inexpensive proposition. Again, the good news is, we can solve your rodent intrusion issues. It's just a matter of how many Tiles are needed?

With all the rodent variables taken into consideration, we just can't answer that question before you purchase our System. If after installing your 1 row System, you see signs of rodent intrusion and want to add Tiles, We, (in good faith) will offer each additional Tile needed to FORTIFY your Grid at a 50% discount.

This helps us sleep at night!

You likely have more questions. Feel free to contact us directly via e:mail or give us a call.
